Ration book 5 may be destroyed. All coupons in it have expired.

1946 Shows Business On Upswing; Credit Buying Increasing; 1947 Shows Promise Of Being Good Year

Business generally was on the upswing in Coleman according to a survey made from among the local merchants.

Old debts appear to have been mostly wiped off, those remaining being now classed as "bad debts." Steady work over a period of years plus the accumulative savings throughout the war years has placed a considerable amount of money in the hands of the buying public. Business, particularly at Christmas time, was especially brisk.

Credit buying appears to be on the upswing. Steady employment with good prospects for the coal industry still in sight, lead some merchants to believe that consumers are buying more on credit with the confident expectation that they can handle such credit buying with steady employment.

Civic finances are in a very healthy condition. Only \$6,000 remain outstanding in town, school and social service. The town has accumulated \$17,000 in bonds which it hopes to use in the purchase of the Coleman Light and Water Utilities. The Board of Public Utility Commissioners is scheduled to hear the Light & Water case either in January or February.

Some years ago the town inaugurated a hard-surface program for its residential streets. In 1946 it started a long range program to lay concrete sidewalks throughout the residential area. In 1947 it is hoped to consolidate all hard-surface already laid by repairing and seal-coating it. The sidewalk program will be maintained.

The coal mining industry appears to have had a good year. International Coal & Coke Co. Ltd. found 1946 its best year since 1942.

The demand for coal continues brisk and the difficulty is anticipated in 1947 in securing coal or orders. The new five day work week will undoubtedly affect production in 1947 since it was only recently inaugurated late in 1946 when the new wage agreement went into effect. Labor shortage still aggravates coal production and while both mines are in need of men, McGillivray Creek Coal & Coke Co. particularly is in serious need of miners.

The new Crows Nest Pass Municipal hospital may be erected in 1947 providing ratepayers in the Pass will vote in favor of the forthcoming money by-law granting an additional \$90,000 to the \$185,000 already authorized. The hospital will have 60 beds and in addition to men and ladies' wards will have

children's wards and a maternity ward. There is dire need for this most important institution in the Crows Nest Pass which is sadly lacking in hospital facilities.

No construction of any consequence has taken place in housing in Coleman since prior to the war. Some months ago the local contractor had orders for twelve houses and this figure may have increased since. Lack of material has prevented even one unit being started.

With the business outlook brighter in 1947 several merchants plan on spending fairly large sums in renovating and modernizing their premises. Jack Chalmers, jeweler, may have set the pace with his newly renovated jewelry store on which he spent several thousand dollars.

A civic centre committee has been appointed and set itself an objective of \$50,000 to build a modern civic centre. The Coleman Crystal arena in which many historic Crow league hockey games have been played since 1921 is believed being operated for the last season due to its physical condition. A new arena must, of necessity, take its place and it is proposed to incorporate the new ice arena in the Civic Centre.

One of the major accomplishments in community activity during 1946 was the organization of a Board of Trade During its eight months of life it has proved itself strong and virile.

Its sights are at present focused on the No. 3 highway which winds its way from the prairie through the Pas and on into British Columbia. This highway has been allowed to deteriorate to the point that Pass citizens are protesting its condition and calling upon a modern hard-surfaced highway to replace it. The sidewalk program is to be maintained.

The game was too one-sided and was described in a Stavely description as the most one-sided game ever played in from Calgary.

The Journal And Staff

Grands Undefeated In Foothills Hockey League; Trounce Okotoks And Claresholm

Club to Travel to High River on Saturday; Young Players Showing Up Well as Opponents Show Strength.

Coleman continued its undefeated way as it bowled over Blairmore, Okotoks and Claresholm on Friday, Saturday and Monday nights respectively. While no official league table has been issued by the Foothills League, Grands should be well out in front and the local players up among the leading scorers.

It appears that some of the teams are strengthening their lineups. Macleod has a forward line from Lethbridge, while on Monday night Claresholm had one or two players in from Calgary.

Grands 18 Stavely 0

Playing their first away game Grands travelled to Stavely where they drubbed the home brews with an 18-0 slacking to score the highest goals total of the present season and hand goalie Dave Pow his first shut-out as a Christmas present.

The game was too one-sided and was described in a Stavely description as the most one-sided game ever played in from Calgary.

Grands 5 Blairmore 2

Braving 15 below zero weather, a fair number of hockey fans turned out to see the opening Foothills League game played in Blairmore last week end and saw the Coleman Grands led by three veterans, Fields, Fraser and Joyce, maintain their winning streak by defeating the locals 5-2.

Fields scored the only goal of the first period for Coleman and Fraser and Joyce collected three for Coleman in the middle stanza while Ulrich counted one for Blairmore.

Both teams scored one each in the final frame, Kovack netting for Coleman and Ulrich getting his second goal for Blairmore.

Lineups

Coleman — Pow, Joyce, Kwasnie, Fraser, Kovack, Krycka, Roughead, Pavlus, Schnepp, Field, Cytko, Antonenko; Mozell, Biegum.

Blairmore — Bruce Miller; Cossens, Morrison; Matinson; Anderson, Bob Miller; Cameron, Street, Windsor, McLean, Johnson, Petersen.

Reeves: Kubasek and Trotz.

Summary

First period: 1. Coleman, Kovack, (Fraser-Joyce); 2. Okotoks, Morrison (Miller) 7:19; 3. Okotoks, Martinson, 18:06. Penalties: nil.

Second period: 4. Coleman, Fraser, 15:40. Penalties: Roughead, Krycka and Miller.

Third period: 5. Coleman, Kovack, 3:07; 6. Coleman, Pavlus, 3:53; 7. Coleman, Kovack, 9:48; 8. Peetrotski, Favero, Kubik, Semenizn, Summary

First period—1, Coleman, Field (Antonenko). No penalties.

Second period—2, Blairmore, Ulrich (Perecinski); 3, Coleman, Fraser (unassisted); 4, Coleman, Joyce (unassisted); 5, Coleman, Joyce (Fraser). Penalties: Kubik and Galacian.

Third period—6, Blairmore, Ulrich (Galacian); 7, Coleman, Kovack (Fraser). Penalty: Deacon.

Grands 6 Okotoks 2

(Continued on Page 8)

derment on the faces of local supporters at the end of the first period, good as it was for the Grands skated off the ice trailing their opponents 1-2. As the game progressed however a much happier expression replaced the bewilderment of the first period as Grands went on to win 6-2.

To the onlooker it appeared that Grands had not anticipated the Piper strategy of having his top players skate, break and pass at top speed and as a result the locals were knocked off stride and failed to gain their confidence and composition till the third period when they started to win going away.

It was a good game to watch, best of the season, and did Grands much good as it made them show class which they have failed to do so far this year, due to the poor opposition. Kovack, Krycka, Cytko and Antonenko, of the younger players, appeared to glory in the speed, accurate passing and sharp-shooting necessary in order to subdue their equals while Fraser, Pavlus and Schnepp sniped goals to help the cause of their younger team-mates. Kovack had a field day with three goals.

Morrison and Matinson scored Oiler's two goals in the first period. Oiler's have a fast skating club with a number of good stick-handlers and will win a lot more games than they will lose, especially in the Foothills league.

Coleman — Pow, Joyce, Kwasnie, Fraser, Kovack, Krycka, Roughead, Pavlus, Schnepp, Field, Cytko, Antonenko; Mozell, Biegum.

Okotoks: Bruce Miller; Cossens, Morrison; Matinson; Anderson, Bob Miller; Cameron, Street, Windsor, McLean, Johnson, Petersen.

Reeves: Kubasek and Trotz.

Considerable Damage Done To Community Hall New Year's Eve; Orchestra Sent Home At 12:30 a.m.

Office Door Smashed in; Piano Damaged; Railings Broken to Kindling Wood; Chair Smashed.

The Community hall executive views with alarm the extensive damage done to the hall on New Year's eve during the two and a half brief hours in which the St. John Ambulance dance was in progress before union president William White called a halt to the systematic destruction by sending the orchestra home and closing the hall doors.

Judging from the damage there is no doubt that some persons went deliberately all out to create as much damage to the hall as they could before the hall committee stepped in. As one entered the union office in the same building on Thursday morning the first thing noticed is that the panels on the lower part of the door were missing and some planks were taking their place in a vain attempt to keep out the winter cold. Some person or persons had deliberately kicked in the panels, thoroughly destroying the door so that a new one will have to replace it.

It was a good game to watch, best of the season, and did Grands much good as it made them show class which they have failed to do so far this year, due to the poor opposition. Kovack, Krycka, Cytko and Antonenko, of the younger players, appeared to glory in the speed, accurate passing and sharp-shooting necessary in order to subdue their equals while Fraser, Pavlus and Schnepp sniped goals to help the cause of their younger team-mates. Kovack had a field day with three goals.

Entering the hall itself one sees broken chairs lying here and there, the legs still held to chairs themselves by the wire which had originally bound them together. The majority of chairs had been placed upstairs and a fence built to stop anyone from going up into the balcony. The fence lay on the floor practically smashed to kindling wood.

It was a good game to watch, best of the season, and did Grands much good as it made them show class which they have failed to do so far this year, due to the poor opposition. Kovack, Krycka, Cytko and Antonenko, of the younger players, appeared to glory in the speed, accurate passing and sharp-shooting necessary in order to subdue their equals while Fraser, Pavlus and Schnepp sniped goals to help the cause of their younger team-mates. Geology In War

MANY INTERESTING STORIES connected with activities during the war are still being told, and it is probable that for some time to come we shall be hearing accounts of events which had to be kept secret at the time they were taking place. Recently the Geological Museum in London, England, was reopened after having been closed for seven years, and a special exhibit, illustrated with maps and specimens, told of the important part the science of geology played in the winning of the war. The exhibit showed that both in theory and also in a very practical way, geologists had contributed materially to the success of military campaigns in Europe and in the Middle East.

Helped To Plan The Invasion

Consulted geologists concerning the character of the beaches and cliffs and the soil beyond, indicating locations where major battles were expected to be fought. In this connection geologists prepared maps showing special features of the land which might affect the movements of the armies. Routes were indicated which would be suitable for heavy vehicles to follow, and experience later showed that units which did not follow these prescribed routes often became bogged in unsuitable terrain. Underground water supply, which is an important branch of geological study was also of great value in the campaigns in Europe and in the Middle East.

Many Projects Of Interest

It is also interesting to learn that British geologists carried on an intensive search for minerals and metals to be used for war purposes and that their services were of great value in the selection of sites for underground factories, airfields, gun emplacements, camps, factories and other wartime building projects. They also made surveys relating to water supplies for the many new areas which were opened in Britain during the war for camps and factories, and they assisted farmers in securing water necessary for the greatly expanded areas of farm lands which were brought under cultivation during the war. It is interesting to learn of the part played by the geologists in these projects and it is obvious that their contribution to the success of the Allied armies was a considerable one.

Ceremony Observed

Quiet Custom Carried Out In Church Of Yorkshire Town

A quaint English Christmas custom is the tolling of the "Devil's Knell" at the Parish Church of the Yorkshire town of Dewsbury. Every Christmas Eve for 700 years this custom has been performed—only broken by World War II when, for security reasons, the church bells of Britain were silent. The custom held Dewsbury is tolled once each year since the birth of Christ, the final strike being timed exactly to fall at the midnight hour. A legend connected with the custom tells how a local baron named Thomas de Soothill, back in the 13th century, killed one of his servants, and to expiate his crime presented the tenor bell to the church with the request that it should be tolled annually. It is said that the custom of keeping the bell tolling for the Devil's knell is still observed.

AUSTRALIA HAS LARGE SUGAR CANE INDUSTRY

BRISBANE, Australia. Australia, producer of 800,000 tons of sugar a year, claims to be the only country to operate a cane sugar industry entirely with white labor.

The Australian cane belt, stretching 1,300 miles along the eastern coast from New South Wales state to tropical northern Queensland, has a population of about 250,000 of whom 90,000 are sugar industry workers. The industry is worth \$60,000,000 a year and output is more than enough to supply Australia's sugar needs. The surplus is exported.

GEMS OF THOUGHT

CONTINUANCE

To reach a port, we must sail, sometimes with the wind and sometimes against it, but we must sail, and not drift, nor lie at anchor—Oliver Wendell Holmes.

Energy will do anything that can be done in this world, and no talents, no circumstances, no opportunities will make a man without it.—Goethe

Goodness and benevolence never tire. They maintain themselves and others and never stop from exhaustion.—Mary Baker Eddy.

I go on with what I am about as if there were nothing else in the world for the time being. That is the secret of all hard-working men.—Kingsley.

Slow wind also brings the ship to harbor.—Swedish Proverb.

Only those who have the patience to do simple things perfectly ever acquire the skill to do difficult things easily.—Schiller.

The tusks of an elephant are really elongated incisor teeth in the upper jaw.

ITCH CHECKED
... or Many Back

For quick relief from itching caused by excess athlete's foot, scabies, and other skin conditions, use pure, cooling, medicated liquid **Dr. D. B. PRESCRIPTION**. Good for sores, stings, sooties, corns, and quickly calms insectitching. Don't suffer. Ask your druggist (today) for **Dr. D. B. PRESCRIPTION**.

Price Control And Rationing Information

Q.—Has canned fruit been removed from ration regulations?

A.—Effective December 16th, all canned fruit, sweetened and unsweetened and those specially prepared for babies, as well as cranberry sauce are removed from rationing.

Q.—Will there be any alteration in the validation of the sugar-preserves coupons because of the lifting of controls on canned fruits?

A.—This will make no difference in the validating of these sugar-preserves coupons. The coupons which would have been used to purchase these items (canned fruits, cranberry jam) will now be available for the purchase of any of the other alternatives in the sugar-preserves ration, such as jams, jellies, marmalades, honey, syrups or sugar.

Q.—How many fluid ounces of maple syrup can I purchase with one sugar-preserves coupon?

A.—Forty-eight fluid ounces of maple syrup can be purchased with one sugar-preserves coupon.

Q.—I am expecting relations to visit me for three or four weeks. Will they be coming from New York and I was wondering if I will be able to obtain rationing for them while they are staying with me.

A.—When your relations arrive they will be able to obtain rationing by applying at the Local Ration Board in your home city. If they leave again for home on April 24, the King and Queen will have virtually finished their tour in Canada and are not buying their meals in restaurants. Naturally, if they were buying their meals, they would have no need for ration coupons.

Please send you questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your eating prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

FORECAST ATOMIC-POWERED CITY IN TEN YEARS

NASHVILLE, Tenn.—Operation of an entire city on atomic power with in the next 10 years was forecast by Prof. Milton Brown of Notre Dame University, former head of a radiation chemistry section of the atomic bomb project at Oak Ridge, Tenn.

Such an atomic energy plant, he said, might be used as the principal unit in the city's sanitation system, purifying its water supply, sterilizing its waste and producing new processes while generating power.

The southern tip of Africa was rounded by a Portuguese explorer five years before Columbus discovered America.

When your BACK ACHES...

Backache is often caused by lazy kidney disease. When you get rid of kidney disease and parasites remain in the system, then headache, headache, rheumatic pain, twisted rest or that "tired out" feeling may soon follow. To help keep your kidneys working properly—try Dodd's Kidney Pills. They're good—safe—tasteless—dissolving—Deemed Dodd's Kidney Pills, the best with the red hand. Sold everywhere, 135

ANSWER TO LAST WEEK'S PUZZLE

INDIAN FIGHTER, 95, RECEIVES AWARD

U.S. War Department Honors Veteran With Purple Heart Medal

LEAD, S.D.—Maj. Charles A. Windolph received on his 95th birthday a Purple Heart for a wound suffered while fighting Indians in 1876.

"I'm proud of it—I earned it," was the only comment of the still sturdy Windolph.

Windolph's family and a few friends watched the ceremony in which the War Department honored him belatedly.

The award was pinned above the Congressional Medal of Honor which Windolph won twice—in 1871 and again in 1878.

Windolph was shot the morning of June 26, 1876 as he was escorting water carriers with Col. W. F. Benten's troops at the time of the Custer massacre. He then was a sergeant.

The Purple Heart is awarded by the United States to servicemen wounded on active service. The Congressional Medal of Honor is the country's highest military decoration.

Likes Window Space

Feature King George Approves In Coaches For South African Trip

For the first time the date of the departure of the King and Queen and Princesses for South Africa has been revealed from an official or semi-official source. Their Majesties will leave February 1, embarking, it is understood, at Southampton or Portsmouth, where H.M.S. Vanguard will shortly proceed to readiness for its important mission.

The Royal party is due to arrive in Cape Town January 17 and to leave again for home on April 24.

The King and Queen will have virtually finished their tour in Britain when they return to Capetown. Princess Elizabeth will celebrate her 21st birthday at Capetown.

Their Majesties were greatly pleased with the royal coaches inspected by them at Birmingham. The Queen especially was complimentary with regard to the coach which she had introduced to her in special coach, which includes dining-room, lounge, and bedroom with bath attached. A feature of the coaches is the maximum of window space, so that all the views available during travel may be seen with comfort and ease. The King remarked upon this and expressed his approval.

Learned Hard Way

Reason Young Soldier Knew How To Handle Wheel Chair

This happened at Times square and 43rd street in New York. A veteran in a wheelchair was looking around for someone to help him across the street.

An elderly man took hold of the chair and he seemed confused about what to do. Just then a young fellow came along and deftly lifted the chair off the curb, wheeled it across the street, and lifted it gently back on the sidewalk again.

"Thanks," said the veteran, "you handle the chair like an expert."

"I should," was the reply. "I lived one of these things until I got my store legs."

Dr. Chase's Nerve Food

EXPOSE NAZI-LIKE PLOT—Startling confessions of a Nazi-like plot against the U.S. government were made by James Childers, 18, and Lanier Waller, both members of "Columbus, Inc.", a racist organization with headquarters in Atlanta, Ga. Columbus' president, Emory Burke, is before a grand jury on charges of mailing riot. Evidence was obtained by the Non-Sectarian Anti-Nazi League of New York, whose agent, Rene Forrest, 24, joined the Columbians and worked as their secretary. She photographed their records on microfilm using a cigarette-lighter-sized camera. Childers and Waller were later persuaded to sign written statement describing the organization's activities. Shown are Miss Forrest with Childers and Waller, at right.

FLAMES RAZE MONTREAL MARKET—Historic Bonsecours market in Montreal was razed by a two-alarm fire that caused damage estimated at close to \$300,000. Cause of the blaze is unknown. Driving rain and thick smoke hampered the work of firemen. One hour after the second alarm the fire was under control. Whole sections of wall were chopped away by firemen in order to bring hose line into play.

FORMER GERMAN LINER WRECKED—The former German liner Europa ripped her moorings in an 80-mile-an-hour gale recently, drove three times across Le Havre harbor and crashed into the wrecked liner Paris after striking another vessel. The 49,716-ton Europa, renamed La Liberté, listed at a 45-degree angle with a hole in her starboard side penetrating to the engine room, but later righted herself. With water pouring into the liner through the gaping hole, the crew abandoned La Liberté. The ship was being converted into a luxury liner by France, to whom it was given as a reparations prize.

A Great Advantage

Employees In Denver Stores Being Taught How To Serve

From Denver, Colorado, comes a report that the retail merchants of that city in co-operation with the University of Denver School of Commerce, conduct an institute where etiquette, good manners, personal charm and correct conversational English are inculcated in employees. Admirable qualities for salespersons—as also for those who go down to the stores to shop.

It is difficult to imagine that the members of the 3,000 families in Denver, whose contact is joined by the Denver employers with a corresponding interest in their employees' welfare, many of whom see the advantage of giving their employees fair pay and humane consideration of workers.

BREAK UP WARSHIPS

PORTSMOUTH, Eng.—Because of dry rot due to neglect during the war, two of the world's oldest wooden warships, the HMS Victory and the Foudroyant, now in harbor here, may be broken up shortly. The Impregnable, a two-decked ship of the line, was laid down in 1757 and fought at Trafalgar as the French Duquesne. The Foudroyant, a frigate, formerly was H.M.S. Trincomalee, and is about 20 years younger than the Impregnable.

"Strangely enough, the two ships

are the same size."

"Where the two ships are the same size,

ESTIMATES OF EXPENDITURES BEING PREPARED IN READINESS FOR OPENING OF PARLIAMENT

OTTAWA. Government offices are in the midst of compiling estimates of expenditures for the 1947-48 fiscal year, and orders have been issued to department heads to have them ready by the end of this month.

The estimates are presented to parliament shortly after the opening of each session, and this year, with the session opening Jan. 30, they likely will be tabled early in February.

They gave parliament an outline of what the government expects to spend during the next fiscal year on agriculture, public works, health, defence, and other government services.

The three branches of the defence department are understood to be making a drive to whittle expenditures. With the three branches now under one minister again, it is believed efforts will be made to integrate the services and eliminate duplication of machinery.

While the defence department estimates may be lower than those for the agricultural department are expected to be higher. It was learned the government has almost definitely decided to pay \$5-an-acre bonus for every acre sown to barley this year.

Public works estimates will be higher as well. With supplies becoming more readily available, it is believed the department will undertake works postponed during the war years.

In the health department the estimated cost of family allowances will be considerably higher as a result of the move to make the allowances payable to all children under 16 regardless of the taxpayers' income category.

CONDAMN PROPOSALS TO ALLOW PRISONERS TO STAY

EDMONTON—Federal government proposals to allow German prisoners of war to remain in Canada were condemned yesterday by the Edmonton and Montgomery branch of the Canadian Legion.

The meeting approved a resolution to be forwarded to Prime Minister King asking that the prisoners all be returned to Germany.

Members also passed a resolution expressing dissatisfaction over the fact that members of General Anders' Polish army brought to Canada had not been obliged to take an oath to bear arms in defence of Canada in any emergency that might arise.

BRITAIN'S FOOD MINISTER SAYS MARKET GOOD FOR INCREASED SUPPLY OF CANADIAN BACON

LONDON—Food Minister Strachey said he does not propose to visit Britain in 1947 and since then an estimate of 300,000,000 pounds had been given.

"Recently there have been indications that the estimate is optimistic," he said, adding that the annual Canadian agriculture conference in Ottawa had raised the target figure for hog production in 1947.

Speaking at a press conference after consultations with L. W. Pearsall, manager of the Canadian bacon board, Mr. Strachey said Canada remains the chief supplier of bacon to the United Kingdom. He added that Canadian shipments were down and world feed shortages made it difficult for other countries to raise their supplies.

The food minister said he hoped Danish bacon shipments would be up in 1947 but 50,000 tons was about the best that could be expected in view of feed shortages, compared with 47,000 tons from Denmark in 1946.

Britain benefited from increased Canadian production in 1946, he said, with 125,000 tons shipped compared with 64,000 tons in 1938.

"Our real problem is to keep up Canadian supplies and that will not be easy as they might well fail to their pre-war position," Strachey said. "There is plenty of room in the British market for both Canada and Denmark and we can do with full Danish shipments and full home production and still take Canadian shipments. There should not be a fear that supplies produced will be crowded out."

Mr. Strachey said the solution for shortages would be found in cattle and other livestock feed and if Britain could buy corn and similar products she would be able to supply home pig producers and help Denmark get its feed supplies.

Asked if feed shortages affected Canadian food minister said Canada had to plan agriculture as between wheat and mixed farming including bacon.

World cereal shortages had meant a great pressure on Canadian farmers to grow maximum supplies of wheat. In a statistical review the minister said the Canadian agriculture ministry had hoped to be able

SEARCH SUCCESSFUL

Vancouver Girl Found After Missing From Home For Eleven Months

VANCOUVER—Red-haired Emma Marshall, 21, is home after 11-month-old search for a five-week 12,000 miles quest by a private detective from Vancouver.

She walked across the United States border at White Rock, B.C., last January because she "wanted to see the country" and fearing deportation for illegal entry, cut off all ties with her family.

Theodore Flint, the detective, took up the cold trail in November, traced the missing girl in story-book fashion through Seattle, Portland, Reno, San Francisco, Cleveland and finally New York where she had stayed at a 72-hour lobby vigil.

"We thought it would be a routine \$50 one-day job," Flint said. "Instead it took five weeks, cost \$1,200 and I found I had to pluck her out of 8,000,000 people in New York."

Emma's carpenter father used all his savings and borrowed money to finance the search.

"I'll help pay back the money," she said. "I've got a job."

RETIREMENT FUNDS

Armed Forces May Apply Unused Credits For Retirement

OTTAWA—Members of Canada's three armed services who have joined the permanent force will be able to apply for their unused re-establishment credits toward their retirement funds.

The action was taken in an order-in-council announced recently which amends the War Service Grants act. It allows permanent force personnel to use their unused credits covering a back period of contributory requirements under the Militia Pension Act. The payments date back to the time of original enlistment.

THE HIGHEST AWARD

BRITAIN.—The Victoria Cross, Britain's highest award for valor, has been substituted for an earlier award of posthumous mention in dispatches to Lieut. Thomas Wilkinson, Royal Naval reserve, who near Singapore in 1942 took a small patrol vessel into battle against a heavily-escorted Japanese convoy.

Important Cabinet Changes

Finance portfolio is assumed by Defence Minister Douglas C. Abbott, who temporarily retains present duties.

NEW RUST-RESISTANT WHEAT INTRODUCED

Rodman Leads List Of Varieties At Agronomists Meeting

WINNIPEG—Redman, a new rust-resistant wheat, made its appearance near the top of the list of wheat varieties tabled at the Manitoba agronomists annual meeting here. Still in the experimental stage and short supply, this new variety was tried in all sections of the province with success, the agronomists said.

The performance of the newcomer, Redman, indicated that it was only a matter of time till it would succeed as the most popular variety in the province, they said.

The standings of various types of grains remained much the same throughout the province the association said, noting little change. Regent was rated first in wheats; Stewart heads durum wheats; Exter the oats; Sanita and Plush the feed barleys; Montcalm the malting barleys; and Royal in the south and Redwing in the north the flaxes.

BRIGHT FUTURE

President Truman's Advisers Predict More Favorable Outlook For Jobs

WASHINGTON—President Truman's council of economic advisers predicted for the United States a "more than ordinarily favorable" outlook for jobs and production for "some years ahead."

A temporary "dip" may come in 1947, the board of three economists told him but "courageous and sensible" action by business and labor can hold the recession to "moderate proportions, if not avert it."

After next year's possible recession, the report said, "broad basic conditions suggest that Dominion labor," he said, "is in a position to meet some years of high production, employment and purchasing power without the display of any extraordinary economic statesmanship by leaders of industry, labor, farming and finance."

Governor-General Of Malaya Married In Ottawa

Reception at Government House was attended by 450 guests who felicitated Rt. Hon. Malcolm MacDonald and his bride. Seen with them, Miss Sheila MacDonald, left, groom's sister, bridesmaid, and A. D. P. Heaney, right, clerk of privy council, best man. First husband of the bride, mother of two children, Col. J. Rowley, was killed in action.

CANADIAN FACTORIES STEADILY INCREASING PRODUCTION TO MEET CONSUMER DEMANDS

OTTAWA.—The wheels of Canada's factories are humming in a mand. For instance, cigarettes rolled steadily-increasing tempo of peace-out of the factories to the tune of time production, but they haven't 12,238,000,000—an all-time high—caught up with the demand for consumer goods unleashed by the war.

The 10-month production of washing machines was 99,994, against a figure so minuscule for the same time last year that statistical officials couldn't put a finger on it today. Electric refrigerators for home use were up to 44,207, also in comparison with a negligible number last year.

In passenger cars, 83,321 came off the assembly lines in the first 11 months of the year. This compared with about 2,000 for the corresponding period of 1945.

Output of home radios showed an enormous jump in the first nine months this year, rising from a "very low" figure to 376,188 with an aggregate value of more than \$17,000,000. While flour production in the opening three-quarters of this year was up to 22,500,000 from 20,605,000. Another item that goes into every home was newsprint, which has hit a new high of 3,437,000 tons for the first 10 months, compared with 2,628,000.

The higher outputs in many lines was achieved despite a major factor tending against increases—a big drop in steel production. In the opening 10 months of 1946, steel output declined from 19,400,000 to 18,774,687 because of the general strike in the Dominion's basic plants.

OUTLINES IMPORTANCE OF EXPANDING THE ARCTIC CHAIN OF WEATHER STATIONS

CROP DISEASE

Manitoba's Crop Diseases And Field Peas Seriously Affected

WINNIPEG—Two of Manitoba's newer crops, sunflowers and field peas, have run into disease problems serious enough to threaten a sizeable cut in the income of farmers who grow them if remedies are not promptly applied, delegates to the annual conference of Manitoba agronomists were told here.

Botanists from the Dominion laboratory of plant pathology also told the conference that while cereal rusts were not as much as evidence during the past season as in previous years, bunt of wheat had been gaining ground in the province during recent years making a marked advance in 1946.

PRICE GOES UP

OTTAWA—Prices board has announced a sharp increase in the price of peanut butter. The board says the price will be allowed to rise by as much as 50 per cent because of increased price of peanuts to manufacturers.

"But," he added, "it will be open season for one week only."

TORONTO—Expansion of a chain of weather stations around the Arctic's rim would enable Canadian weathermen to tell with a high degree of accuracy when a big storm is about to roll down over the northern half of this continent. Andrew Thomson, Canada's new controller of meteorological services, said in an interview.

Currently only six stations chart weather in the Arctic. Within three years they will number 16. But Mr. Thomson said 26 are needed for an adequate report.

In addition, the network of weather observers will help determine what conditions affect flying in the Arctic and trans-polar flights can be made safer and regular.

Some weather stations spot the polar expanses at present that meteorologists call the Canadian-United States sector of the Arctic north of 66 degrees north latitude the "blind spot." It covers 500,000 square miles only six stations watch the weather in that vast region, as compared with 164 in an equivalent area extending north, east and west from Toronto. Facing the six Canadian stations are more than 200 in the European-Asian segment. Comparable prices were 19 to 25 cents.

It is vital importance that is where most of North America's most devastating storms are born. Mr. Thomson said Cold polar air piles up there seethes for a day or two and then heads south to chill millions of Canadians and Americans and possibly cause death, damage and disruption of communications.

BUSIEST AIRPORT

Manager At Vancouver Gives Figures For Last Eleven Months

VANCOUVER—The Vancouver airport now is officially recognized as the busiest in Canada with the largest number of aircraft movements. Airport manager William Templeton said the number of passengers that almost 500,000 passengers flew to or from the Vancouver field every 24 hours during the last 11 months of 1946. More than 2,000 non-scheduled aircraft have touched at the city terminal en route to Alaska and other continental points in the same period.

AUSTRALIA SETS UP FILM ORGANIZATION

SYDNEY. Australia. Loaned by Canada to the Australian government for a year, Ralph Foster, Australia's first film commissioner, has set up the framework for a government-supported film organization based on the Canadian film board.

It is designed to produce films about Australian life for educational and instructional purposes and to publicize Australia abroad.

The Australian film board has completed 25 films of various types including publicity material for national loans, and has 35 more films in different stages of production.

Under Foster, the Australian board has built up a staff of about 40 and its completed pictures have had to do with the six Australian states as well as Australia's mandated territory of New Guinea.

NOTES AND COMMENTS

NEED RAILING

1947 will have arrived by the time this item appears in print. 1947 is the year when a modern hard-surfaced road has been promised to be laid from Pincher station to the Alberta-British Columbia boundary. Should this modern road materialize the provincial highways department should be asked to install a railing along the road leading through the Frank Slides.

This is a particularly dangerous section of the road especially when it is icy on both sides of the highway large jagged rocks lie in wait to rip a car apart and cause serious injury to the occupants.

Time and again cars have gone over the side with cars badly wrecked and occupants taken to hospital. Christmas eve saw another bad accident as a car went over into the jagged rocks and one of the occupants was taken to hospital. Surely there is no need to wait until someone is killed before a protective railing is placed along the most dangerous stretches of the Frank highway. If we are to get a modern highway let it be modern in every respect.

ARE SNOWPLOWS BEING HELD IN IDLENESS?

Information has reached our desk that the Dominion government has three large snowplows, similar in class to the provincial government's new \$22,000 FWD Snow-Go, in cold storage at Lethbridge. We are told efforts have been made by Edmonton to buy these machines without success.

Regardless who may own the machines conditions have been such during the past couple of months in southern Alberta that these machines could have been put to work to advantage.

Highways north and south, east and west, have been clogged with heavy drifts so much so that provincial equipment has been unable to cope with the prevailing conditions and town and municipal machinery has been brought into play to keep the roads open.

Pincher Creek, located as it is off the main highway and CPR line has been practically isolated for weeks and sleighs are being used to get on to the avenues of traffic. If our report is correct that these three machines are lying gathering rust when so much can be found for them literally just outside their garage door then public anger is really going to reach the boiling point.

Words cannot adequately describe our snow blocked roads. One has to experience present conditions, see the drifts and ice on the road, see cars stalled on the roadside with a nail a soul near them, see bus passengers being placed on trains, to sit during the long cold hours of a winter's morning with

a snow laden hurricane whistling past your car and you powerless to start the engine because of blocked roads.

If these plows are available it is time our MP's in Macleod and Lethbridge were getting into action and get these machines working. We also happen to be taxpayers to the Federal government as well as in Edmonton,

OUR POSTMASTER

Coleman is indeed fortunate in possessing such a courteous and efficient postmaster as Frank Graham. His name is known in every local household, he is held in high esteem by his fellow citizens and the courteous and efficient service he has rendered during his many years as postmaster is deeply appreciated by citizens.

The services he renders often exceed those for which his position calls. He meets all with a friendly smile and cheery hello. Even during the height of the Christmas rush this friendliness is always present despite the fact he and his staff have to work long hard hours to handle the avalanche of mail which passes through the local office.

Often the more one gets to know another the less regard he has for the latter, but in this case the more you know and work with Frank the clearer it becomes that he's a "swell fellow and a swell postmaster."

RECREATIONAL FACILITIES

Having experienced a full three months of severe winter with still two months to go with the earnest hope that the last two won't be quite as severe as those already experienced, one's thoughts turn to spring and clear warm weather.

Good weather means out-door recreation. We have our ball field, the Old Man river provides the "old swimmin' hole" and Blairmore golf course. The little youngsters have nothing. Once upon a time, and this is no fairytale, there were swings, bars, see-saws, etc. in the school grounds and also at one time the youngsters played to their heart's content. Fear by some adults that someone might get injured caused them to be taken down.

Why can't Coleman youngsters have their recreational facilities the same as any other normal town? Where is the equipment taken from the school grounds? If Coleman desires to cater to its youngsters in the form of recreational areas now is the time for their consideration, not when the good weather is on the wane.

We once made a suggestion that the three Pass Lions clubs consider placing recreational facilities at Crows Nest Lake to take care of the many Pass youngsters who frequent that area particularly on a Sunday afternoon and evening. We still think it a good idea.

Mack Stigler, a patient in the local hospital for several weeks, was allowed home for the Christmas holidays.

Mrs. Steve Penney spent the holidays at Calgary with her husband who is a patient in the Holy Cross hospital.

Mr. John Trstensky was a recent Calgary visitor where he visited his son John who is a patient in the Holy Cross hospital.

Mrs. Thorson and family, of the west coast, are spending the holidays with the former's parents, Mr. and Mrs. Herb Sherratt.

Mr. and Mrs. Tom Holstead and Audrey spent Christmas at Pincher Creek, guests of Mrs. Holstead's parents, Mr. and Mrs. T. M. Brown.

Miss Betty Hillary, nurse-in-training at the Holy Cross hospital, Calgary, spent the holidays with her parents, Mr. and Mrs. Joe Hillary.

Mr. and Mrs. Alex Groeck are spending the holidays at Dapp, Alberta, the guests of the former's parents, Mr. and Mrs. Mike Garkach.

Constable and Mrs. Anderson, of Lethbridge, were the Christmas holiday guests of the latter's parents Mr. and Mrs. John Morison.

Mr. and Mrs. Albert Kropinak, of Seattle, are the guests of the latter's parents, Mr. and Mrs. Wm. Michalsky, and other relatives for two weeks.

Rev. Wm. Grazier who had been a patient in the local hospital for several weeks was allowed home prior to Christmas to spend the holidays with his family.

John Anderson jr. was allowed home from Holy Cross hospital after a week as a patient. Jockie made it home in time for Christmas and especially the New Year.

Dr. and Mrs. A. L. Goodman and young daughter spent the Christmas holidays at Edmonton where they were the guests of Mrs. Goodman's parents, Mr. and Mrs. W. Walker.

Mr. and Mrs. H. T. Halliwell, Mr. and Mrs. Jack Moffitt and baby, all of Macleod, and Mrs. Madge LeRoy, of Penticton, were the Christmas holiday guests of the R. R. Patterson's and Al. Hayson's. Mrs. LeRoy is spending the holidays with her parents at Macleod.

TRAVELLING WITH THE HOCKEY CLUB

On Monday evening we had the privilege and pleasure of traveling with Coleman Grands as an official "member" of the club. The trip was to be made to Claresholm to keep a scheduled date with the Claresholm Clippers.

Due to heavy snows, icy roads and huge snow drifts across the roads captain Bill Fraser went ahead of the van and surveyed the route phoning back in late afternoon that conditions were favorable. At approximately 4:30 pm, three player laden cars started out from the Grand Union with a cold west wind blowing powdered snow across the road.

The roads were clear until Lundbreck was reached when a narrow trail through high drifts gave a hint of what was to come. Ice covered the road at Cowley and driving was treacherous. The car carrying the sticks on its hood lost the sticks but fortunately heard the heavy load fall off and stopped to pick them up. Getting past Cowley and onto the long stretch of road immediately east of the town a series of drifts were experienced one car getting stuck for a few minutes before it was able to navigate with the aid of a push from several players.

The west wind continued to blow hard and for miles on end hardly an inch of the highway was seen as the powered snow kept crossing and criss-crossing it. Travel was necessarily slow at this point. The second incident was when a brand new synthetic tire decided it did not want to go any farther and completely collapsed. The wind howled and the snow blew and the occupants "blessed" it as all had to get out to change the tire. Fortunately one of the other cars had arrived to help.

At Pincher the drifts were high but still cars were getting through. Drifting snow was proving a hazard to motorists and at Pincher station six cars were lined up bumper to bumper and the occupants were said to have gone ahead by train the previous day.

Getting into Macleod was quite easy as the road was clear of snow. Going into the Java shop we met Mrs. A. L. Godman who was enroute home to Coleman with her Ford coupe which she had picked up at Calgary. She had heard about the condition of the road and asked that some of the players take her car back to Coleman. This request was immediately granted and she stayed at Macleod while the team went over to Claresholm and came away with a 7-4 win from the Clippers.

Back again at Macleod for a late supper the team formed into a five car cavalcade and set forth for home at 11:30 pm. All went fine until within a mile from Pincher station when the first car ran into a big drift. It got stalled but with the aid of approximately sixteen big husky men it was soon over the hurdle and the other cars followed in its trail getting help when necessary. The wind was blowing really strong and the men had to put their backs to it. Drifts were being met more frequently and as Pincher station was finally reached one car finally quit cold with its battery dead. This same car was pushed through a heavy drift with a dead engine. It was now past midnight and rather than leave the stalled car by the wayside it was attached to another car and a determined effort made to start the engine, all being in vain. Getting past the station about 200 yards Duke Kwassie was sent ahead to scout for drifts. He returned with a report that drifts continued along the road in a continuous series and varied from small to drifts three and four feet. It was decided it was useless to fight longer and the cars were lined alongside the road bumper to bumper. The Greyhound was right behind but the driver decided to send his passengers along the way by rail. Mrs. Godman and about four or five players in the party decided they had had enough and went to Pincher station where they bought tickets.

The rest of the party were recruited to spending the balance of the morning, now about 2 am, in their

WEDDINGS

BLAZENKO—MITCHELL

A recent wedding took place at Michel when Margaret, youngest daughter of Mr. and Mrs. J. K. Mitchell, of Michel, became the bride of Mr. Alex Blazenko, youngest son of Mr. and Mrs. J. Blazenko, of Coleman, Alta. The ceremony took place at the Michel United church with Rev. J. H. Matthews, of Fernie officiating. The bride, who was given away in marriage by her father, wore a floor-length gown of white lace over taffeta and long net veil with a sweetheart head piece and carried a bouquet of red roses and white carnations.

Mrs. M. Hook of Michel was matron of honor in a floor-length gown of powder blue crepe taffeta and velvet. She carried a bouquet of mums. Mr. Mike Hook of Michel supported the groom, Miss Shelia Haigh of Michel played wedding music while Mrs. S. Groot, also of Michel rendered a solo. Following the ceremony a reception was held for 130 invited guests in the church hall at Michel. The bride's table was centred by a three-tiered wedding cake flanked by pink and white tapers. Serviters included Mrs. S. Groot, Mrs. D. Martin, Miss Mary Bath, Miss Evelyn Laurie and Miss Mary Robertson. Rev. W. H. Matthews proposed the toast to the bride with the groom responding.

Mr. and Mrs. Blazenko left for a honeymoon trip to Calgary after which they will reside at Coleman.

Rector: Rev. W. Grazier

Sunday, Jan. 5, 2nd Sunday after Christmas, 2 p.m., Sunday school, in parish hall.

The Rector extends to all wishes for a Happy New Year.

SALVATION ARMY NOTES

Coleman will be privileged to have in its midst a guest in the person of Major J. Martin, Salvation representative for the province of Alberta. Major Martin will conduct special meetings in the local Salvation Army hall every evening, commencing on January 4, to the 14th.

Major Martin comes to Coleman with many years of faithful officership, having been stationed throughout the three prairie provinces, some appointments being at

The marriage was solemnized on Dec. 12 at Knox United church of Laura Blackmore, eldest daughter of Mr. and Mrs. J. A. Nuell of this city, to Mr. Robert Guy Hleuka, son of Mr. and Mrs. N. Hleuka of Coleman. Rev. A. R. Hubbard performed the service.

Given in marriage by her father, the bride wore a white sheer gown with a sweetheart neckline. A comb of orange blossoms held her embroidered veil and she carried a bouquet of pink roses. Her only jewelry was a string of pearls, a gift of the bridegroom.

Mrs. Frank Bowman, sister of the bride, was matron of honor, and Mr. A. J. Nuell attended the bridegroom. Mr. Frank Bowman ushered the guests.

During the signing of the register, Mr. Leonard Sykes sang "Because."

A reception was held later in the Hotel Bliss where Mr. C. G. Yearwood proposed a toast to the bride.

Mr. and Mrs. Hleuka will make their home in Calgary.—Calgary Herald.

Record Mailings During Christmas

The Christmas rush at the local post office was the heaviest on record. The parcel post both outgoing and incoming showed a considerable increase over previous years.

The number of letters put through the rotary stamping machine totalled 78,619, this outfit last

year's mark by 20,000.

The post office department authorized the use of two local trains for the conveyance of the mails, making the total of four trains daily during the period of Dec. 17 to 24. This enabled the local office to despatch all of the parcel post mail up to 2 p.m. daily, while the letter boxes were cleared up to 1:30 in the afternoon.

Local cards mailed was the heaviest in years, and the accumulation during one day in particular amounted to six thousand.

The Norwegian Bible Society has announced that 100,000 Bibles are being printed in Norway to satisfy "Bible hunger" in that country.

U.S. Fleet Admiral William (Bull) Frederick Halsey, Jr., 64, has been relieved of active participation in naval affairs at his own request.

Bananas now are being grown in Iceland. Three bunches imported from the tropics in 1938 have produced fruit in an electrically-heated Iceland greenhouse.

A Royal Navy Volunteer Reserve officer's association has been formed to maintain a London clubhouse, establish a welfare fund, publish a magazine and hold reunions.

Air Experts Triumph Over Fog Menace

HIGH PRESSURE BURNERS THAT HEAT ATMOSPHERE CLEARS RUNWAYS

ARCATA, Calif.—The magic fingers of science, probing through the invisible, are robbing fog of its menace.

In experiments here, fog has been dispersed to a level as high as 2,000 feet from the earth. Regarily, the soupy stuff is caused to disappear 300 feet up, plenty high to permit safe landings of aircraft. FIDO, war-horn system of intensive dispersal of fog, now beefed up to increased efficiency, is the answer.

At the fog-swept naval air station here, a high pressure system of burners, each with an atmospheric, ordinary low-grade diesel oil, atomized through special nozzles under pressure of 1,500 pounds a square inch, casts its heat upward, at a thermal rate double that of older systems.

Both directly and by radiation, the heat swirls upward to disperse the fog. After a few minutes, the sourest fog disappears over the runway, permitting planes approaching by electronic control to make clear landings.

However, the fog may stay and United Air Lines experts charged with beating fog have other potential aids in their respective sleeves.

Sonic fog dispersal is one. A battery of 12 powerful sirens, lining the up-wind side of the runway, blast at intervals, creating a powerful sound wave. In effect, the sound waves cause the particles of fog to move in cycles which vary with the sizes of the droplets.

As the particles move, they collide, and as they do, they coalesce and grow. When a particle becomes sufficiently heavy, it simply drops to the ground. And the fog dissipates.

Other acts up the scientific sleeve include curtains of water and air.

The air, blown upward, comes into play when the wind is side. This causes the heat to drift also, reducing the visibility ordinarily achieved. Hence, a curtain of windward air of the runway is also blown straight up so cutting artificially an eddy which slows down the wind blowing horizontally. Such action serves to maintain the heat over the runway, continuing the clearing where it is needed.

Very Ancient Boats

MOST INTERESTING TYPE EVER FOUND IN ENGLAND BEING SALVAGED

The London Times says work has begun on excavating ancient boats discovered embedded in the banks of the River Humber at North Ferriby, a few miles from Hull. The boats are at least 2,000 years old, and efforts will be made to dig them out. In a solid block of clay and haul them up the foreshore by slipping a sledge of steel underneath them.

C. W. Phillips of Cambridge University, who with Dr. Penderleith of the British Museum Research Laboratory, is superintending the excavations, describes them as the most interesting ancient boats found in this country. They are a unique type of Homeric craft certainly embedded in the mud when Julius Caesar landed.

They were made in plank form, Mr. Phillips explains, seen with new withies and cleverly counter-sunk to avoid wear. Possibly they paddled. They are certainly not in the ancestral line of European sailing ships. He regards the discovery as of great importance in the history of European water transport. Only 30 feet of one boat is left, and the other is about 37 feet long.

Luzon is the largest and richest island of the Philippines.

TO WED TENNIS PLAYER

Actress Diana Barrymore, daughter of the late John Barrymore, and tennis player John Howard will be married in New York, Dec. 30, it is reported in Hollywood.

IODINE LACK CAUSES GOITRE

Despite the fact that lack of iodine causes simple, or endemic goitre, and despite the fact that iodized salt is the most practical method for supplying iodine, one-half the salt used in Ontario last year was iodized, Dr. E. W. McHenry said in a lecture in Toronto recently.

Dr. McHenry, Professor of Public Health Nutrition, School of Hygiene, University of Toronto, was speaking at one of a series of nutrition lectures arranged by the Toronto Branch of the Health League. He said that goitre is a nutritional disease which is being badly overlooked.

He added that it is known that it is not possible for most people in Canada to obtain iodine from salt because of the lack of iodine in salt from customary supplies of food and drinking water. Therefore, limiting the sale of table salt so that only iodized salt could be purchased would be highly desirable.

Iodized salt was compulsory in all army and air force establishments in Canada during most of the war, he said, but "no one seems to care about civilians. So far as iodine and the prevention of goitre are concerned, civilians are left to their own resources."

Dr. McHenry said that nutritional conditions in Canada are sufficiently good to prevent iodine deficiency disease, goitre, occurs with any frequency among adults. Rickets and scurvy were occasionally found in babies, but diseases caused by faulty nutrition which have plagued other countries, like beri-beri and pellagra, are non-existent in Canada.

He said sufficient quantities of different foods are available in Canada to provide every Canadian with nutrients needed for health, but there is need to see that the food habits of many need to be improved and that the available foods are not being properly used.

"Ignorance and indifference," he said, are the main causes for malnutrition in Canada. As for overweight, Dr. McHenry said he includes obesity under malnutrition.

THRIFTY CANADIANS

Thousands Of People Investing Their Savings In Safe Securities

In spite of a sharp mark in spending and saving, Canadians are saving more than as they seek to replace goods worn out during the war years when they were not available, we are maintaining a high level of saving.

The figures for the Canadian Savings Bond recently astonished a lot of people. Canadians bought well over \$400,000,000 worth of these bonds, and they did so with the least possible urging. This figure was far larger than was reached in any war loan drive during the First Great War.

On top of this the people of Canada bought \$104,576,000 worth of war bonds in the month of October. This does not take into account pension bonds, annuities, group insurance or paid-up additions to present policies. It's a high figure, very considerably higher than the pre-war monthly levels.

Not only does this show a great confidence in Canadian life insurance concerns but it also shows that the people of the Dominion are putting into practice the thrift lessons they learned during the war. It's just another reason why Canada stands high in the eyes of the world.—Lethbridge Herald.

Need Of Humor For Happy Home

**Mrs. Geoffrey Fisher Stresses
On Essential Foundations
For Children's Happiness**

LONDON.—Security and a sense of humor are prescribed by Mrs. Geoffrey Fisher, wife of the Archbishop of Canterbury, as essential foundations for a happy home. Mother of six sons, Mrs. Fisher spoke in a broadcast.

"Home-making is not an easy job," she said. "Besides hard work and sacrifice, it needs self-control and patience, but perhaps a sense of humor is the most important quality needed for family life."

Children needed a feeling of absolute security, founded on trust in their parents.

"There is no more tragic figure than that of a child who has suffered from the first time that his father or mother has let him down. At first he will make all sorts of excuses for his parents, but if it continues becomes callous and cynical."

"Many homes are breaking up because of a lack of truth, faithfulness and love in their family relationships. Children from these broken homes become problems because the security needed for their development was taken from them."

The family is the best training ground for life, Mrs. Fisher said, because it represents the community in miniature; and the intimate family circle is the best testing place of character.

FAIR WARNING

Little Mike didn't like kindergarten and refused to go any more.

His mother reasoned with him, scolded him, threatened him, and definitely insisted on his returning.

"Okay, Mom," said the little boy. "If you want me to grow up to be a beastrider, I'll go."

THEIR HELP NEEDED

The R.A.F. has appealed to all German civilians and authorities to help in the search for 20,000 R.A.F. men reported missing over Germany during the war, the British news service in Germany reported.

Dr. McHenry, Professor of Public Health Nutrition, School of Hygiene, University of Toronto, was speaking at one of a series of nutrition lectures arranged by the Toronto Branch of the Health League. He said that goitre is a nutritional disease which is being badly overlooked.

He added that it is known that it is not possible for most people in Canada to obtain iodine from salt because of the lack of iodine in salt from customary supplies of food and drinking water. Therefore, limiting the sale of table salt so that only iodized salt could be purchased would be highly desirable.

Iodized salt was compulsory in all army and air force establishments in Canada during most of the war, he said, but "no one seems to care about civilians. So far as iodine and the prevention of goitre are concerned, civilians are left to their own resources."

Dr. McHenry said that nutritional conditions in Canada are sufficiently good to prevent iodine deficiency disease, goitre, occurs with any frequency among adults. Rickets and scurvy were occasionally found in babies, but diseases caused by faulty nutrition which have plagued other countries, like beri-beri and pellagra, are non-existent in Canada.

He said sufficient quantities of different foods are available in Canada to provide every Canadian with nutrients needed for health, but there is need to see that the food habits of many need to be improved and that the available foods are not being properly used.

A Closed Country

But Russia Eventually Will Have To End Its Isolation

It would be difficult to imagine a more completely closed state than Russia in this age of communication says the Winnipeg Free Press. Such a trade-proof and information-proof zone is considered, one of the miracles of our age and is only possible in a Police state.

It may be a long distance off yet, but the time will come when Russia, like the United States, will have to end its isolation. In the present world nearly two hundred million energetic people, covering a large part of the earth's surface and owning a large part of its resources, cannot be hived off from other peoples in a vacuum. All men in physics, in particular, operate to destroy the vacuum wherever it appears.

NO CANADIAN BUTTER EXPORTED TO UNITED KINGDOM

It has been reported frequently that Canada has exported important quantities of butter to the United Kingdom. That is not correct, stated J. F. Singleton, Associate Director, Marketing Service, Dairy Products, Dominion Department of Agriculture, and Chairman, Dairy Products Board, in an address at the recent convention of the Ontario Creamery Association, at Niagara Falls. Ont. No butter, he said, had been exported to the United Kingdom, although don't rely on that, he added. Quotas of Canadian butter have been provided for ships' stores, and those would be classified as exports to the countries to which the ships were sailing. Total quotas established amounted to 5.6 million pounds of which 3 million pounds was "cooking" butter of such low quality that there was no market for the product in Canada. Quotas for "table" butter totalled 2.6 million pounds. The quota export will amount to about 1.7 per cent. of total production of creamery and dairy butter.

Though there is no grass in the Arctic, sealing is one of the chief industries. The seals graze on moss, as do caribou and musk-ox in our northern latitudes.

Atlantic Wireless Forty-Five Years Old

Newfoundland Received First Signals From Cornwall, England

The first wireless signals across the Atlantic were received Dec. 12, 1901, in a little room in Cabot tower on a hill in Newfoundland now known as Signal Hill. Guglielmo Marconi and his assistants, P. W. Bell and G. S. Kemp, had been anxiously waiting since the previous day for a series of S signals from a station at Poldhu, Cornwall, England.

Suddenly the silence was broken by a series of dots, and the three young boys had done the impossible and received a message over 1,900 miles of rugged Atlantic water. Marconi began his experiments which laid the foundation for wireless communication in Bologna, Italy, in 1895. Studying electricity at the university, he became interested in wireless and became fascinated with certain phenomena. His first experiment consisted of pushing a button in his father's villa and ringing a bell a considerable distance away without the use of wires.

When he announced his intention of bridging the Atlantic by wireless it was declared impossible. Now a memorial cairn nine feet high erected by the Canadian Marconi company in 1939 will be dedicated in a formal presentation to the people of Newfoundland early next summer. Dedication ceremonies were postponed with the declaration of war.

Less than 10 per cent. of the potential water power of the world has been developed, according to estimates.

STUDIES WITH STOGIES

Please send me a million dollars a year to enjoy—she says—by Jean Leyell, freshman at Back Bay college, Boston, as she does her lessons. She averages one cigar a week and insists she likes them.

A USEFUL TIP

Do you dislike going to the dentist because of the pain he causes you? Then take a tip from Dr. Sidney Tarachow, a New York psychiatrist, who said that the next time you make an appointment with your dentist, go there with a full stomach. Hunger, he said, increases physical tension and pain.

Wooden matches are made at a rate of 1,125,000 an hour on modern machines.

OUR COMPLETE
SHORT STORY—**"SUPER"**

By E. SHEPPARD

Copyright Wheeler Newspaper Syndicate

LYDIA was getting more and more angry. And what made it even more difficult was that Ted seemed to have no idea he was making her feel bad—and that she was right.

"Oh, she's super," Ted was enthusiastic. "Just super." And since the object of his conversation was not his fiancee Lydia, but a woman he had never met, and was never likely to meet, Lydia was having a time to keep a pleasant smile on her face.

Ted and she were walking slowly towards town; it was still early enough for the birds to be twitting gently, and the sun was slanting across the sky. It was a quiet evening, a peaceful, comfortable evening in a quiet town, and although there were horrible things going on in the world, starvation and strikes and crime, they seemed remote, and everything should have been perfect, with a handsome couple strolling along in the sunset, the man returned from the war, the girl engaged to marry him.

Lydia slipped her arm through Ted's.

Ted kicked idly at a pebble. "It's a pity, you know," he said slowly, "that everyone in the world couldn't be like she is—lovely, kind, sweet—oh just... just..." he fumbled for words. "Just super."

"How do you know she's lovely, kind, sweet and super?" said Lydia, fighting to control her patience. "She's just a movie actress."

Ted smiled confidently. "You can always tell the real thing; if it's a person's super, I mean. For instance, you."

"Yes?" said Lydia eagerly, about time he said something nice about her. After all, she was there—not an illusionary blonde parading on a screen. Besides, Lydia had dark hair, she was tall and well-built, and it to wonder aloud if Francine Francine's hair was, well, natural... No, she must never appear eatily or jealous. If that was her weakness, that feeling of being hurt when he raved about someone else (even a movie star) she must try to fight it. It was such a silly thing—jealous of... Well, why wasn't Ted going on. Hadn't he started to say something about her?

"Yes?" prompted Lydia.

His fingers gave here quick pressure. "I think you're super, too, Lydia."

"Toot! Really!"

"Have you ever written her a fan letter?" she asked suddenly.

Ted shook his head. He changed the subject. "Where we going?" he asked. "We should do something. What do you want to do, honey?"

"Oh, a dance," said Lydia. "I'd love to go to a dance, Ted."

"Will you?" said Ted. "I hoped—well, Lydia, there is a film of Francine's on at the Capitol I'd like you to see. It's wonderful, and you should see Francine..."

"But—if you've seen it?" protested Lydia, lighting a boing cigarette. "I don't mind going again," said Ted, a fanatical light in his large brown eyes. His face softened into a fatuous smile; he sighed. "She's..."

Came the revolution. "I know—she's Super," cried Lydia. "Well, Ted Richards, I don't want to go to her show. I—I want to see—oh—Charles Boyer or Dame Clark—or Cornel Wilde—they thrill me; positively thrill me. They're wonderful; they're super."

Ted turned to face her. They stood gazing at one another. She can't stand it, I'm going again," said Ted, a fanatical light in his large brown eyes. His face softened into a fatuous smile; he sighed. "She's..."

"Come on the revolution. I know—she's Super," cried Lydia. "Well, Ted Richards, I don't want to go to her show. I—I want to see—oh—Charles Boyer or Dame Clark—or Cornel Wilde—they thrill me; positively thrill me. They're wonderful; they're super."

"But don't you understand," he began, when Lydia cut in with "Understand? Am I to understand perhaps that this gorgeous creature is say, a long-lost relative in disguise? Or maybe you met her overseas? Maybe she entertained your regiment? Maybe just you? What am I to understand?"

Ted found his tongue then, and before the desperation in her young voice, and the pleading showing beneath her display of temper, he told her the truth, and it was beautiful to hear.

**SCIENTIFIC
BEAUTY SCHOOL**

201 STERLING SECURITY BLDG.
WINNIPEG, MAN.

"Oh, Lydia, don't you get it?" he said earnestly. "Francine's so lovely, so sweet—when I see her so wonderfully on the screen, or even a picture of her, every girl in the room—she always has; she always will. You are both so out of this world, and I feel such a lucky jerk. Lydia, honey, don't you understand? You're super."

Should Be Encouraged

Children Confined If Efforts At Drawing Are Corrected

If your young son or daughter wants to draw a blue donkey or a six-legged horse, don't try to put him right. That's the advice of the British ministry of education in a pamphlet, "Artful Drawing," issued in a town, and although there were horrible things going on in the world, starvation and strikes and crime, they seemed remote, and everything should have been perfect, with a handsome couple strolling along in the sunset, the man returned from the war, the girl engaged to marry him.

Ted slipped her arm through Ted's.

Ted kicked idly at a pebble. "It's a pity, you know," he said slowly, "that everyone in the world couldn't be like she is—lovely, kind, sweet—oh just... just..." he fumbled for words. "Just super."

"How do you know she's lovely, kind, sweet and super?" said Lydia, fighting to control her patience. "She's just a movie actress."

Ted smiled confidently. "You can always tell the real thing; if it's a person's super, I mean. For instance, you."

"Yes?" said Lydia eagerly, about time he said something nice about her. After all, she was there—not an illusionary blonde parading on a screen. Besides, Lydia had dark hair, she was tall and well-built, and it to wonder aloud if Francine Francine's hair was, well, natural... No, she must never appear eatily or jealous. If that was her weakness, that feeling of being hurt when he raved about someone else (even a movie star) she must try to fight it. It was such a silly thing—jealous of... Well, why wasn't Ted going on. Hadn't he started to say something about her?

"Yes?" prompted Lydia.

His fingers gave here quick pressure. "I think you're super, too, Lydia."

"Toot! Really!"

"Have you ever written her a fan letter?" she asked suddenly.

Ted shook his head. He changed the subject. "Where we going?" he asked. "We should do something. What do you want to do, honey?"

"Oh, a dance," said Lydia. "I'd love to go to a dance, Ted."

"Will you?" said Ted. "I hoped—well, Lydia, there is a film of Francine's on at the Capitol I'd like you to see. It's wonderful, and you should see Francine..."

"But—if you've seen it?" protested Lydia, lighting a boing cigarette. "I don't mind going again," said Ted, a fanatical light in his large brown eyes. His face softened into a fatuous smile; he sighed. "She's..."

Came the revolution. "I know—she's Super," cried Lydia. "Well, Ted Richards, I don't want to go to her show. I—I want to see—oh—Charles Boyer or Dame Clark—or Cornel Wilde—they thrill me; positively thrill me. They're wonderful; they're super."

"But don't you understand," he began, when Lydia cut in with "Understand? Am I to understand perhaps that this gorgeous creature is say, a long-lost relative in disguise? Or maybe you met her overseas? Maybe she entertained your regiment? Maybe just you? What am I to understand?"

Ted found his tongue then, and before the desperation in her young voice, and the pleading showing beneath her display of temper, he told her the truth, and it was beautiful to hear.

Fashions4507
SIZES
6-14BY ANNE ADAMS
Button-Happy

Sent twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Name, Address and Style Number and send orders to Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg, Man.

In Wrong Order

Dentists Believe Citrus Fruits Should Be Eaten After Breakfast

NEW YORK.—If you've ever tried eating your dessert first, this will prove easy.

Dentists meeting here decided that breakfast is eaten in the wrong order. Fruits or fruit juices which usually start the morning meal should be taken last, they said.

The citrus acids tend to remove fermentable starches which lead to tooth decay.

A QUEER COIN

SPRINGFIELD, Ill.—Alfred Johnson found a half dollar with tails on both sides and the United States government investigated. Federal agents told him it wasn't counterfeit and possibly was an accident minting freak. He received a \$500 offer for a half interest, based on the coin's value as a collector's item, not on its use in flipping.

I believe that copper was first used about 3500 B.C. by the Egyptians.

**NEW ZEALAND WAGES
WAR ON EROSION**

Large Scale Plans To Cut Down Losses Of Farm Lands

WELLINGTON, NZ.—War on a huge scale is to be waged in New Zealand against soil erosion which has caused drastic losses to farm lands.

The measures planned include the planting of 1,000,000 acres of trees on New Zealand farms and the consolidation of vast areas of Crown and unfarmed lands into national parks where scientific steps to check erosion will be taken.

In the highlands of the South Island nearly 3,000,000 acres of grazing land have lost 25 to 50 per cent. of the topsoil through erosion and over a further 2,200,000 acres more than 50 per cent. already has been lost. These figures do not include severe losses of soil on cropped lands and plains by wind erosion.

Highly productive sheep and cattle country on the North Island is also severely eroded.

The country consists chiefly of small but steep hills which did not erode in their natural state, but when the forest growth was cleared with the help of axes, the soil was washed away.

Hundreds of slips and landslides appeared and the topsoil was washed down into the rivers and out to sea.

On the west coast of the North Island also large areas of high-rainfall country have been virtually abandoned because of extreme erosion.

A major project in the soil conservation program will be recuperative treatment of 8,000,000 acres of high country in the South Island.

This will be achieved by tree planting, fire control, spelling, seeding, fencing and subsequent control of grazing to within reasonable limits.

A similar conservation program will be undertaken over several million acres of hill country in the North Island.

Prefer Farm Life**City Is Much Too Lonesome Opinion Of Some Young People**

Of 134 students voting in a Des Moines, Iowa, school, 33 expressed the opinion that the big city is the place to live, 39 per cent. preferred the small town, and only 12 the country.

"Would you like my last winter's hat, Mary?" she asked her daily helper.

"Oh, thank you, Mrs. Brown!" Mary answered. "That's the one my boy friend likes me best."

Appalled Signs

Landlady: Don't kill your wife; let me do the dirty work.

Tantrum: Come to us; we'll tan your budes.

Shoemakers: Come in before you lose your sole.

Dairy: From moo to you.

Man: He is one of the most altruistic men I know.

Fried: What has he been doing now?

Man: He spends all of the afternoon telling hair-raising stories to a couple of half-educated men.

Pat (on the morning of his birthday, rubbing his hands together at the prospect of a present)—Sure Ol always does my duty and Ol always mane to do it.

Boss: I believe you, Pat, and therefore I shall make you a present of all you have stolen from me during the past year.

Pat: Thanks, your honor, it is very kind of you; and may all your business acquaintances treat you as liberally.

He (on the morning of his birthday, rubbing his hands together at the prospect of a present)—Sure Ol always does my duty and Ol always mane to do it.

Pat: I believe you, Pat, and therefore I shall make you a present of all you have stolen from me during the past year.

He (on the morning of his birthday, rubbing his hands together at the prospect of a present)—Sure Ol always does my duty and Ol always mane to do it.

Pat: I believe you, Pat, and therefore I shall make you a present of all you have stolen from me during the past year.

He (on the morning of his birthday, rubbing his hands together at the prospect of a present)—Sure Ol always does my duty and Ol always mane to do it.

Pat: I believe you, Pat, and therefore I shall make you a present of all you have stolen from me during the past year.

He (on the morning of his birthday, rubbing his hands together at the prospect of a present)—Sure Ol always does my duty and Ol always mane to do it.

Pat: I believe you, Pat, and therefore I shall make you a present of all you have stolen from me during the past year.

Mr. and Mrs. Wes. Vincent left on Sunday for Redcliffe, Alta., near Medicine Hat, where the former has secured a position as assistant superintendent in a plant located in that town. Mrs. Vincent will return to Coleman for a brief time before taking up permanent residence at Redcliffe.

Grands Undefeated

(Continued from Page 1)

Pass, Grands took along Mike Hude who was without refereeing experience and Mike proved too inexperienced. The Clarendon referee, who has had considerable experience, was too partial to the home boys and many off-sides were in evidence. At one time Grands were short two men against the combined Clarendon team.

It was midway through the first period before Grands found their stride and Bill Fraser and Teddy Kryczka put on a brother act to score three goals within two minutes, Kryczka getting two goals and an assist while Bill got one goal and two assists. Bill Field was given two minutes penalty for a minor infraction.

In the second period Coleman dominated, so much so that the game dragged a little with Clarendon hesitant to open up a spirited attack "Duke" Kwasnie crashed his way into the Clippers' defence and passed to Kovack who beat Barrie for Grands fourth goal.

Roughhead had a nice solo effort when he stole the puck from the defence to race in on Barrie for Grands fifth marker. Cytko and Roughhead followed each other to the cooler seconds apart to leave Grands two men short. Fraser, Kryczka and Mozell, along with Dave Pow actually outplayed the Clipper sextet who failed to get a proper shot on goal. Roughhead was still off when Kryczka, who played a marvellous game, snared the puck at his opponents blue line to beat Barrie and earn a round of applause.

Sheer desperation forced Clarendon to swarm to the attack in the third period and they outplayed Grands by a wide margin. Grands were actually shooting the puck down the ice to relieve pressure. Tarnow, who was in on all four Clarendon goals, spearheaded the attack with a goal at the 7:30 mark. Mozell and Kovack combined on a break-away to get this one back. Clarendon continued to swarm to the attack and Dave Pow was like an acrobat as he jumped around his goal. Brown scored Clippers third goal on an assist from Tarnow and the same two players reversed the procedure a few minutes later with Tarnow getting the fourth goal.

Clarendon: Barrie; Young, Anundsson; Brown, Tarnow, Yost; Kneeshaw, Preecy, Jenkins, M. Jenkins, Hage, Steven.

Coleman: Pow; Kwasnie, Mozell; Fraser, Kovack, Kryczka; Joyce Pavlus, Field; Roughhead, Cytko, Antonenko, Biugus.

Referees: Braaten, Hudz.

Summary

First period: 1, Clarendon, Brown (Tarnow) 1:30; 2, Coleman, Kryczka (Fraser) 12:08; 3, Coleman, Fraser (Kryczka) 13:13; 4, Coleman, Kryczka (Fraser) 13:40. Penalties: Field.

Second period: 5, Coleman, Kovack (Kwasnie) 2:34; 6, Coleman, Roughhead, 7:36; 7, Coleman, Tarnow (Mozell) 19:58. Penalties: Cytko, Roughhead.

Third period: 8, Clarendon, Tarnow, 7:30; 9, Coleman, Kovack (Mozell) 11:10; 10, Clarendon, Brown (Tarnow) 15:11; 11, Clarendon, Tarnow (Brown) 17:31. Penalties: nil.
